

Wizcon Supervisor 9.3

Even more security and functionality with Wizcon[®] 9.3

The new version of Wizcon[®] Supervisor™ builds upon all the improvements made in Wizcon 9.X for enhanced security, robustness, connectivity and ease of development. It also adds major new security features that enable tighter integration to enterprise Information System infrastructures and to video-based security systems.

Integration with Enterprise Information Systems

- LDAP support to access Microsoft[®] Active Directory[®] for user management

Integration with Video-based Security Systems

- Video integration for facility management

Versatility, expansion to new application fields

- ActiveX support

Flexibility and ease of use

- More flexible actions on alarms

Easier application development

- Alarm Templates
- BACnet offline tag generation
- Extensions to tag templates

Improved "look and feel"

- Unified Web interface for User Time Table / Shift Management
- Multi-Tag window

And other enhancements

- Localization of alarm level inhibition
- New fast actions
- New toolkit functions
- etc.

Collect, Control, Communicate!

Optimize your SCADA with the new version of the advanced reporting module: WizReport XL 7.0

The new **WizReport™ XL** version 7.0 now features English, German, French and Spanish (User Interface and User Guides) and a brand new Project Explorer, which further simplifies reporting projects.

It is the most easy-to-use, cost-effective, flexible reporting product on the market today. Simply set up your report templates in Excel and let WizReport™ XL do the rest automatically. It's that easy!

WizReport XL's powerful scheduler automatically performs all the workbook and worksheet management, applies powerful analysis to the data and then distributes the completed reports to printers, file servers, web servers, PDF, XLS, HTML, email and much more.

* Download your free evaluation copy at www.wizcon.com and solve your reporting problems today!

Report, Analyze, Publish!

The industry's most open, complete SCADA toolbox

Some of the new features in Wizcon® 9.3

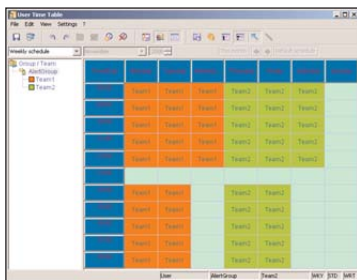

ActiveX support

Active Directory integration

- Secure, centralized user management via LDAP using Microsoft® Active Directory® (or other wide-spread user directory services) for tighter integration with the Enterprise IT Infrastructure.

ActiveX support

- Wizcon Supervisor gains versatility of many new applications in various sectors.
- Ability to embed and interact with ActiveX objects in a local image.

Unified Web Interface for WizAAM & Shift Management

Omnicast video integration

Wizcon Supervisor uses ActiveX controls and a partnership with Genetec to integrate Omnicast™, a leading-edge IP video surveillance solution, providing unified management of security video, audio and data via IP networks:

- Native access to a powerful video management system within Wizcon Supervisor
- Wizcon Supervisor integrates the capability to display/manage a Virtual Matrix (up to 32 embedded windows), control cameras (PTZ, digitally zoom live video, instant replay), record and access a digital archive, manage advanced video alarms, etc. and also access video analytics tools for abnormal object and human detection
- Open architecture: free choice of hardware (legacy or new, analog or digital) and distributed IT infrastructure
- Easy facility management and maintenance through one single Wizcon user interface
- Total integration with Access Control, Building Automation, Intrusion Detection, POS, HVAC...

New Multitag List

Web interface for User Time Table / Shift Management

- New Web interface allowing configuration of on-duty schedules for maintenance operators and WizAAM, remotely through a standard Web Browser.

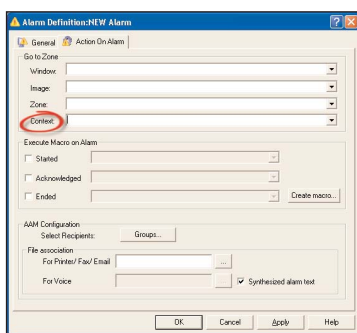

Enhancement of Alarm Level Inhibition

- Support for all languages.

New Multitag List

The new interface allows you to:

- Change TagAddress and Sampling Rate
- Enable/Disable Sampling of all tags from the list
- Force Read of all tags in the list to get the latest PLC values.

IMG in Action on Alarm

Tag Templates

- Extension of Tag Templates to all Wizcon windows (event summaries, history viewers).

Alarm Templates

Dynamically change the alarm filters that are used to:

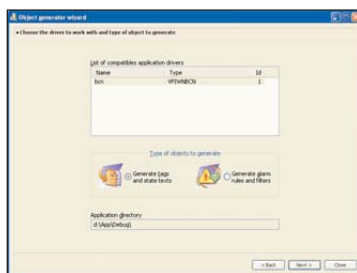

- Animate alarm objects in images
- Filter the information shown in an event summary.

Specify image in Action on Alarm

- When defining an Action on Alarm trigger to jump to a specific zone or image, users will be given the option to define an image different to the selected window and to set the context (Tag Templates).

BACnet offline tag generation

- Wizcon generates Tags automatically, based on an external file (EDE, CSV) containing the BACnet Device's configuration.

BACnet offline tag generation
